

One Source for All of Your Terminal & Business Needs

Guidant delivers best-in-class solutions at any level of terminal operations including measurement, accounting, and control. When your needs span the entire range of terminal operations, then Guidant can also deliver a comprehensive, single-source, end-to-end solution that covers all four levels of your operation.

Guidant's end-to-end solutions captures orders at the back office and manages them all the way through loading. After a load is complete, bills of lading are generated and our integrated system ensures data is passed back through all levels for reporting and invoicing.

Levels of Terminal Operations

- Level 1:** Complete line of Smith Meter®, INVALCO®, and Sening® measurement products and services
- Level 2:** Operations supervisory control and data acquisition/distributed control system (SCADA/DCS)
- Level 3:** FuelFACS terminal management system (TMS) and TMS Host
- Level 4:** Integration with your back office enterprise resource planning (ERP) system
